**SYNCHRONET INTERMODAL SERVICES, INC. MOVES TO NEW
HEADQUARTERS IN VIRGINIA BEACH, VIRGINIA**

More Centralized Location, Easy Access And Improved Office Facilities

Virginia Beach, VA – May 25, 2011 – SynchroNet Intermodal Services, Inc. (SIS)

(www.synchronet.co) today announced the company has moved to a new location. The headquarters office for SIS is now located at 208 Golden Oak Court, Suite 140, Virginia Beach, VA 23452.

ABOUT SYNCHRONET INTERMODAL SERVICES, INC. (SIS)

SynchroNet Intermodal Services, Inc., (SIS) provides domestic repositioning services to handle the surplus of empty containers from inland locations to port cities. The four services of SIS include:

- **Stack-train Service™** – offers equipment and provides stack-train ramp-to-ramp intermodal transportation service. The company's turn-key, "one-stop-shop" combines equipment and intermodal services packaged together for an economic and competitive solution
- **Street-turn Service** – provides a web-based platform for truckers, logistics companies, shipping lines, importers and exporters to benefit from efficient inland or port hinterland street-turns. The automated "matching" service identifies truckers' "street supply" with equivalent shippers' "demand" requirements and presents these opportunities to both the trucker and shipper, plus allows for systematic approval

- **North American Domestic Interchange Service™ (NADIS)** – a web-based solution, which delivers opportunities to reduce empty rail repositioning expenses in the US and Canada. NADIS provides equipment in various North American domestic trade lanes; receiver customers are paid monetary incentives to utilize and reposition containers
- **Exports-in-a-Box™** – offers US and Canadian exporters with solutions to acquire marine containers supplied at key production and manufacturing facilities. The solution combines the innovative technology of SIS with the multi-modal capabilities of Schneider Logistics, which include trucking, domestic intermodal, international container stack-train rail and cross-dock operations

For more information visit SynchroNet Intermodal Services, Inc.'s web site at www.synchro.net, call 1 (757) 410-1762 or email sis-info@synchro.net.
